Professional Summary

Accomplished Business Analyst / Product Owner / Product Manager with 14+ years of experience in Incident Management, product development, roadmap planning, backlog refinement, data analytics, business analysis, and quality assurance across Salesforce Service Cloud, healthcare, education, legal services, and commercial auto insurance. Skilled in Agile methodologies (Scrum, SAFe, Kanban), stakeholder collaboration, and data visualization (Tableau, SQL, Power BI). Passionate about optimizing user experiences, streamlining workflows, and leading cross-functional teams to drive impactful solutions.

Professional Experience

Texas Health & Human Services (HHS) – Austin, TX Chief Product Manager (Healthcare) (Aug 2023 – Present)

- Managed product enhancements, strategic roadmaps, and product backlogs for the Medicaid Fraud and Abuse Detection System (MFADS), Transformed Medicaid Statistical Information System (T-MSIS), and Centers for Medicare and Medicaid (CMS) Data Quality initiatives supporting Electronic Health Records (EHR). Coordinated data quality improvement efforts, compliance monitoring, corrective action planning, performance reporting, and stakeholder communications, contributing to a 30% improvement in federal compliance and reporting accuracy.
- Facilitated collaboration among Medicaid program areas, Information Technology teams, vendors, contractors, and external stakeholders to support data governance, regulatory compliance, system modernization, and operational excellence. Developed business requirements, governance documentation, standard operating procedures, dashboards, performance metrics, and executive status reports to support informed decision-making and continuous improvement.
- Supported enterprise Medicaid Enterprise System (MES) applications by managing service requests, production incidents, defect resolution, and system outages impacting Medicaid operations. Led issue triage, root cause analysis, risk mitigation, and cross-functional resolution efforts while ensuring system stability, regulatory compliance, and uninterrupted support for critical Medicaid business functions.
- Experienced in analyzing business processes, data quality trends, and operational workflows to identify opportunities for process automation, modernization, and efficiency improvements. Provided technical assistance, policy interpretation, and subject matter expertise related to Medicaid data management, Centers for Medicare and Medicaid CMS reporting requirements, data integrity, and program performance monitoring.

Sogeti – Remote, Senior Consultant Product Manager (Legal Services) (Mar 2022 – Jun 2023)
